

3mm Aluminium Drum Kit Shells

Since the launch of Echo's Apollo Aluminium drum kit in early 2011, there has been many developments in our shells. Each of the shells feature; machine welded seams, as good as our welders are, you cannot match the precision and consistency of our state of the art straight seam welder. Sharp cut double 'V' bearing edges which are then sanded by hand, giving the perfect platform for your head to seat onto comfortably. And our latest addition of 6mm thick aluminium re-rings, adding strength, rigidity and ensuring total 'roundness' off all our shells.

Rack Toms	6"	7"	8"	9"	10"	11"	12"	13"	14"
8"	£230	£232	£234						
10"	£237	£239	£241	£243	£245
